

What is a solar roof system?

The system is made up of individual panels mounted onto the roof which sit on top of your existing tiles or other roof finish. This solar roofing system is proven and widely available, but the main downside is the aesthetics. With an on-roof system, the panels are clearly added on as an afterthought and are not integrated into your home.

Can a solar roof power a home?

Install Solar Roof and power your home with a fully integrated solar and energy storage system. The glass solar tiles and steel roofing tiles look great up close and from the street, complementing your home's natural styling. Schedule a virtual consultation with a Tesla Advisor to learn more.

Should you consider a solar panel roof?

If you are particularly worried about aesthetics, you may consider choosing a solar panel roof. These solar roof tiles allow the system to sit flush with the surrounding tiles and blend seamlessly into the roof. However, they are more expensive than on-roof or in-roof systems.

What is on-roof solar roofing?

On-roof solar panels make up the most widely recognisable solar roofing system in the UK. The system is made up of individual panels mounted onto the roof which sit on top of your existing tiles or other roof finish. This solar roofing system is proven and widely available, but the main downside is the aesthetics.

What is solar roof & how does it work?

As a fully integrated system, Solar Roof can maximize your solar generation and help you take control of your monthly electricity bill. Solar Roof brings your roof to life with beautiful tiles that can power your home with clean energy for decades. Learn more about installing Solar Roof.

Can solar panels be installed on a tiled roof?

Solar panels can be installed on a tiled roof in three ways: by installing solar tiles directly onto the roof or by attaching panels using mounting brackets. Most people install solar systems on their existing houses ('retrofit') using this method.
