

Why should you lease a solar panel system?

Leasing a solar panel system offers a cost-effective path to adopting renewable energy, ensuring significant savings. With EIC's Lease-to-Own service, you can export excess energy back to the grid and automatically become the full owner of the solar equipment once the lease period ends.

What is a commercial solar operating lease?

A commercial solar operating lease is a great way to go solar without any upfront costs. With a commercial solar operating lease, you simply pay a monthly fee for the solar panels that are installed on your property. The solar panels are owned and operated by the solar company, so you don't have to worry about maintenance or repair costs.

How long does a commercial solar lease last?

The lease term is typically 15-20 years, after which the lessee has the option to purchase the solar panels or have them removed. Commercial solar operating leases are a popular financing option for businesses looking to go green and save on energy costs.

What is a solar lease?

Solar leases are similar to car leases; they are a form of third-party ownership. Under a solar lease, the third party installs solar panels on your property and then sells you the electricity produced. Your monthly lease payment is based on the estimated annual production of your solar system.

Are leased solar panels a good investment?

For example, more energy-efficient equipment can lower your business energy use. Balance sheet impact: leased solar panels will reduce your company's running costs, but they will not appear as an asset on your balance sheet. Your accountant needs to consider the impact of this on your business. **What Are The Pros Of Leasing Solar Panels In The UK?**

Can I lease my land for solar power generation?

Landowners interested in leasing their land for solar power generation will need to find out if they have a grid connection located on their land or in the vicinity with surplus power in the local area.
