

Solar power generation corporate income tax rate

Are solar panels a special rate expenditure?

With effect from 1 April 2012 for corporation tax and 6 April 2012 for income tax, all capital expenditure on the provision of solar panels is specifically designated as special rate. The reason for designating solar panel expenditure as special rate expenditure was to ensure clarity of treatment.

How to claim solar power depreciation benefit under GST?

The rate of depreciation allowed under the income tax for solar power generation units is 80 % and it is an accelerated rate of depreciation. So the party has to file the regular tax returns only. There is no special form prescribed for claiming the depreciation benefit. IMPLICATIONS OF GST ON DELIVERED COST OF RENEWABLE ENERGY

Are electricity sales taxable?

This includes both sales of exported electricity and any Feed in Tariff. Any income from a domestic installation at a let dwelling is taxable (even though capital allowances are denied). The principal incentive for residential landlords is to improve the EPC rating (but your tenant will appreciate the lower energy costs).

How to claim solar power depreciation benefit?

APPLICATION The rate of depreciation allowed under the income tax for solar power generation units is 80 % and it is an accelerated rate of depreciation. So the party has to file the regular tax returns only. There is no special form prescribed for claiming the depreciation benefit.

Is a generation tariff liable for income tax?

A generation tariff received in a private capacity, which is not chargeable as miscellaneous income, will not be liable to Income Tax but the reduced cost of electricity should be reflected in the cost of electricity attributed to business use. An export tariff is payable for electricity exported to the wider energy market.

Is a commercial solar installation eligible for capital allowances?

Installations on farm outbuildings (or in fields), which supply electricity to the farm (on its own or in conjunction with the house) or to multiple properties, are commercial. Commercial installations are usually larger than domestic ones. The cost of a commercial solar installation is eligible for capital allowances.

There are some special provisions for taxation of renewable energy installations and the income derived from them. In principle, the Feed-in Tariffs provide an income stream which helps to repay the capital cost of installing the renewable energy installation.
