

The scheme "Assistance For Capital Investment In Solar Power Generation" is a sub scheme under the "Investment Promotion Scheme (IPS)" for MSME Sector. It was ...

The International Energy Agency says wind power will grow by 8% and solar power by 13%. Once completed, the solar power plant becomes the cheapest technology to operate for power ...

Concentrating solar power (CSP) has received significant attention among researchers, power-producing companies and state policymakers for its bulk electricity generation capability, overcoming ...

A 760kW solar power generation system was installed on the factory roof last year--a proportion of this generation is what will be used in the new power system, also ...

Solar Turbine's cogeneration system can turn clean-burning natural gas into cost-effective, reliable electricity, use steam for production processes, implement heat for water and building ...

Nevertheless, the development and planning of large-scale PV power plants are intricate and complex. It entails not only considering the resources themselves but also their ...

Solar photovoltaic (PV) panels convert sunlight into electricity for your home. Read our complete guide now.

Return on investment Rooftop solar PV is a good investment opportunity in its own right, providing an internal rate of return of 10-15%* on self financed projects. Asset value and desirability ...

As part of its policy to encourage investment in solar energy, the Zimbabwean government intends to exempt investors from paying taxes for a period of 5 years. ... This will ...

With the progress of new energy technology, solar PV power generation equipment will gradually increase the efficiency, with a smaller investment risk. Therefore, the ...

Exagen Group, a significant player in the UK solar and energy storage sector, has received a full buyout from British energy titan Octopus Energy Generation. The 100% equity buyout, which was carried out on behalf ...
