

Solar power generation means no electricity bills

Do solar panels affect your electricity bills?

Let's chat about what could affect your electricity bills even if you have solar panels. It's not always as straightforward as "I have panels, so no more bills." Several things come into play: How and When You Use Energy: Think of electricity as your favourite snack.

Do solar panels generate electricity?

That said, the rate at which solar panels generate electricity varies depending on the amount of direct sunlight and the quality, size, number and location of panels in use. Even in winter, solar panel technology is still effective; at one point in February 2022, solar was providing more than 20% of the UK's electricity.¹

How do solar panels reduce your electricity bill?

Solar can reduce your electricity bill through: You can save the most money by self-consuming, or using, the electricity generated by your solar system. You can think of a solar panel as being a bit like a tap with water flowing out of it. The power output (measured in watts or kilowatts) is how fast electricity flows out of the panel.

Can solar panels cover my electricity bill?

With enough solar panels and batteries, it's possible to cover your entire electricity bill, but it's not cost-effective. What's the average electricity bill with solar panels in the UK? The average electricity bill for a three-bedroom household with a 3.5 kWp system is £163,236 per year.

Can you use solar energy to power your home or business?

When you use solar generation to power your home or business appliances, you need to buy less electricity from your electricity retailer. This is called solar self-consumption. Every kilowatt-hour (kWh) of solar generation that your household or business self-consumes means one less kilowatt-hour (kWh) of electricity bought.

What if I don't use my solar panels?

If your solar panels produce electricity you don't use - as the great majority of panels do - you can sign up to a Smart Export Guarantee (SEG) tariff and sell your excess solar energy back to the grid.

Skip the guessing game with solar. With solar, energy costs are extremely predictable. Many homeowners are able to cover 100% of their energy needs with their solar system, in which ...
