

What is the first electric energy storage system in Spain?

In November 2019, Iberdrola España inaugurated the first electrical energy storage system with lithium-ion batteries for distribution networks in Spain.

Can battery storage systems be retrofitted in Spain?

The first solution is battery storage systems that enable peak shift, i.e. feeding electricity into the grid at times when the wholesale price is higher, usually before and after sunset. Fortunately, the retrofitting of battery storage systems in Spain is unproblematic from a regulatory perspective.

How much will Spain finance a hybrid battery energy storage project?

The Spanish government says it will finance five hybrid battery energy storage projects, with a cumulative installed capacity of at least 600 MW. Each project can secure up to EUR15 million (\$15.68 million) in funding. From pv magazine Spain

Where will a battery be installed in Spain?

In Castilla y León, a battery will be installed in Revilla Vallejera (Burgos), where Iberdrola España completed its first hybrid wind-solar plant in Spain in 2023. Extremadura will have two new batteries. The company will install two batteries in the province of Caceres, where the C. Araúelo I and II photovoltaic plants are located.

What are the innovative energy storage projects developed by Iberdrola?

Below, we highlight the innovative energy storage projects developed by the company. Iberdrola España has commissioned the first photovoltaic project in Spain to incorporate an energy storage battery at the Araúelo III photovoltaic plant, with an installed capacity of 40 MW. The project incorporates a 3 MW battery and 9 MWh of storage capacity.

How many batteries will Extremadura have?

Extremadura will have two new batteries. The company will install two batteries in the province of Caceres, where the C. Araúelo I and II photovoltaic plants are located. In Castilla La Mancha, two batteries will be installed in the municipalities of Valverdejo, Alarcón and Olmedilla de Alarcón (Cuenca), where Iberdrola España has solar parks.

Spain is targeting 20GW of new energy storage by 2030. MITECO also launched a similarly-sized grant scheme specifically for co-located or hybridised energy storage projects, for which proposals were due in March ...
