

Will LG Chem build a joint EV battery plant in Morocco?

Last year, LG Chem signed a comprehensive memorandum of understanding with Huayou Cobalt to build a joint EV battery material plant in Morocco.

How Chengguang is a leader in battery industry?

Chengguang is always committed to be the leader of global battery industry. We own total 18 battery assembly lines, 9 grid production lines, 10 coating lines, 28 casting grid machines, and 15 pieces of 28-ton Lead powder machines. Chengguang have total 18 highly automated assembly lines, which can assemble 40,000 pieces per day.

Will LG Chem expand battery production capacity in China?

CHINA DAILY LG Chem, a South Korean chemical company, will further expand battery material production capacity in China and strengthen collaboration with Chinese companies as it sees enormous growth opportunities from China's emphasis on sustainable development and the cultivation of new quality productive forces.

How Chengguang battery charging equipment works?

Chengguang battery charging equipment are with auto cooling system which can control the battery outer temperature during the charging process. Chengguang have total 3 Punched grid production lines, 6 Pulled Grid Production Lines, and 28 Casting grid machines, which can produce 3.5 million pieces of battery plate per day.

How many lead production lines does Chengguang have?

Chengguang have total 18 highly automated assembly lines, which can assemble 40,000 pieces per day. With 15 pieces of 28-ton Lead powder production lines, Chengguang is able to guarantee the daily Lead Plate supply to smooth the next other battery production processes.

Operations have begun at leading chemical producer Qixiang Tengda's new propylene oxide complex in Zibo City, China, using technology from Evonik and thyssenkrupp ...

????????????????,????????15????????200????????????,????????,????????,????

Production facility-ZIBO QIXIANG TENGDA CHEMICAL CO.,LTD. Qixiang Tengda currently has four sets of methyl ethyl ketone units, 150,000 tons/year butadiene units, and 50,000 Ton/year rare earth butadiene rubber device, ...

The other is a new hydrogen peroxide megaplant licensed from Evonik to provide the raw material directly on-site. Evonik is also supplying its catalyst specifically designed for the process. HPPO (hydrogen peroxide
