

The "rooftop revolution" is a plan from the Labour party to encourage millions more homes to be fitted with solar panels as well as see more solar farms created. Three solar farms in the East of England have already ...

4. Commit to new solar, tidal, and hydrogen Triple our solar power with a target of 40GW by 2030 in a mix of rooftop and larger field solar. Harness the UK's marine power potential, by returning to the case for a tidal lagoon pathfinder project, as recommended in the Hendry Review. Raise the ambition stated in the Hydrogen Strategy

The solar industry has welcomed the UK Department for Energy Security and Net Zero's (DESNZ) plans to reform its flagship renewable energy generation scheme to reward applicants for including factors other than price. This announcement follows the review of the Contracts for Difference (CfD) scheme which began in December 2022.

The government has launched the Clean Power 2030 Action Plan, which sets out how it intends to achieve its "clean power goal" of generating at least 95% of Great ...

Clean Power 2030 Action Plan calls for grid reform. The Clean Power Action Plan notes that the grid connection queue has grown tenfold in the last five years and contains the equivalent of 739GW capacity--many of the projects in the queue are speculative or do not have the funding or planning permission to progress.

It is a similar story for onshore wind and solar. Neso envisages a trebling of solar power, from 15GW of capacity now to 47GW by 2030. Since solar needs about 5,000 acres per gigawatt this means ...

This action plan sets out a pathway to a clean power system, what government will do to support and accelerate delivery of the new infrastructure we will need, and how we ...

The forthcoming Clean Power 2030 Action Plan will set out the further steps we will take, including reforming the planning system and building the grid. In delivering our next steps, we will do ...

This action plan sets out a pathway to a clean power system, what government will do to support and accelerate delivery of the new infrastructure we will need, and how we will work, as government ...

Electricity market reform. The electricity market is going to be reformed to support low-carbon flexible capacity. Sector-specific barriers to deployment are going to ...

As mentioned in the Renewables section of this plan, 2 projects passed the power BECCS project submission

deliverability assessment for deployment by 2027, Drax Power Ltd and Lynemouth Power Ltd.
