

Transnistria energy storage charging pile red sign

Why is Transnistria struggling with energy crisis?

Moldova's pro-Russia breakaway region of Transnistria is grappling with an energy crisis after Russia cut off gas shipments to the country at the New Year, leaving residents without reliable gas and electricity in the middle of winter.

What is happening in Transnistria?

Transnistria, a breakaway Moldovan province loyal to Russia, has been in the headlines this week amid an energy crisis triggered by a recent Ukrainian decision to suspend a Russian gas deal via its territory to the region.

What happened to Russian gas in Transnistria?

The Cuciurgan power station in Transnistria turns Russian gas into electricity, some of which it sells to Moldova. Now Russian gas supplies have been cut off, that plant is producing vastly less energy. Moldova has had to buy from emergency European markets - mostly via Romania - at nearly twice the price.

Does Russia still buy energy from Transnistria?

Despite ending gas purchases from Russia, it still bought large amounts of its energy from Transnistria, which uses Russian gas to generate electricity at the Cuciurgan power plant. The Cuciurgan power station in Transnistria turns Russian gas into electricity, some of which it sells to Moldova.

Can Russia end the energy crisis in Transnistria?

Russia may also stand to gain from declining to end the energy crisis in Transnistria - whose people it claims to support. Russia has long worked to destabilize Moldova, most recently in its presidential election in October, which was framed as a choice between Moscow and the West.

Will Chisinau sell gas to Transnistria?

Chisinau has offered to sell gas and energy to Transnistria, although officials in Tiraspol show little sign of accepting the offer. The main reason is economic. Unlike Moscow, Chisinau is not proposing to send gas for free. After 30 years of abundant, low-cost energy, Transnistrians would now have to pay the same rate as those in Moldova proper.
