

# Video tutorial on installing large solar panels on the roof

Should you install solar panels on your roof?

Installing solar panels on your roof can both save you energy costs and reduce your home's environmental impact. Even though there are some DIY solar panel options, installing them is a highly complex project, and you'll still need assistance from an experienced professional.

How do you install solar panels on a roof?

The first step in the physical installation process is securing the roof attachments supporting the solar panels. First, the installer will find the rafters beneath your roof shingles. They'll either use a stud finder or measure from the roof's edge to find the rafters, typically spaced 16-24 inches apart.

What is a roof-mounted solar panel installation?

Roof-mount solar panel installations are less intrusive and invasive, and there is no need for extensive pre- and post-installation work or construction. Roof-mounted solar panels add aesthetic appeal and blend seamlessly with roofs, making them ideal for residential rooftop surfaces.

How to choose a solar roof?

Also, while identifying the total rooftop area, you can specify the extent of shade-free area. Ascertain the endurance capacity of the roof, as the solar panels are bound to weigh heavy on it. To avoid a collapse, you must inquire into the durability of your roof. Also, ensure cleanliness and orderliness for effortless solar rooftop installation.

How to choose a solar panel installation?

Identifying the area for solar panel installation helps determine how many solar mounts you need. Also, while identifying the total rooftop area, you can specify the extent of shade-free area. Ascertain the endurance capacity of the roof, as the solar panels are bound to weigh heavy on it.

How to avoid a solar roof collapse?

To avoid a collapse, you must inquire into the durability of your roof. Also, ensure cleanliness and orderliness for effortless solar rooftop installation. Solar conduits are electrical wires that run from your solar panels (solar conduits) to your house.
