

What tools are needed to install lead-acid batteries

Do I need to EQ a lead acid battery?

Steve Higgins, Technical Services Manager at Rolls Battery highlights some of the frequently asked questions when it comes to proper maintenance and service of lead acid batteries. When do I perform an EQ Charge? If you are properly charging a lead acid battery bank to full on a regular basis, you should never have to EQ a battery bank.

What is a lead acid battery?

A lead acid battery is a number of cells filled with a mixture of sulfuric acid and water called electrolyte. The electrolyte covers vertical plates made of two types of lead. Chemical action between the electrolyte and the lead creates electrical energy. Volt (V): the standard measure of electrical potential.

Who should handle lead acid batteries & sulfuric acid?

Batteries and sulfuric acid should be handled only by persons who have been instructed on the potential chemical hazards, in accordance with the OSHA 29 C.F.R. 1910.1200, Hazard Communication Standard. Refer to EnerSys® Safety Data Sheet (SDS) for lead acid batteries.

How do I assemble a battery rack/enclosure?

To assemble a battery rack/enclosure, please see rack installation instructions. Connect battery modules together to the required system voltage, then connect battery string with charger or load; When multi-strings of batteries are to be parallel connected, connect batteries in series first and then complete the parallel connection.

How do you remove acid from a battery?

Acid which is removed from spent batteries may be regulated C.F.R. 1910.1798(n). 2. Use a lifting device with two hooks which are electrically insulated from each other to prevent short circuits. Use a lifting beam that is completely insulated if possible, like an EnerSys PRO Series® Adjustable Lifting Beam.

How do you handle sulfuric acid in a battery?

Refer to EnerSys® Safety Data Sheet (SDS) for lead acid batteries. In handling sulfuric acid, wear a face shield, plastic or rubber apron and gloves. Avoid spilling acid. Do not get acid in eyes, on skin or on clothing. In case of contact, flush immediately and thoroughly with clean water for at least 15 minutes.
