

Northvolt CEO Peter Carlsson. Photo: Magnus Hjalmarson Neideman/SvD/TT Swedish battery giant Northvolt has produced a new sodium-ion battery, a technology which could reduce dependence on China.

I don't think everything Peter Zeihan says is wrong, but I dismiss him as any sort of a serious geopolitical intellectual for the following reasons: ... consumer electronics, clothing and textiles, rare earth metals, EV battery materials, most cheap plastic consumer goods, etc. American dependence on foreign goods has only GROWN since launching ...

Northvolt AB is a Swedish battery developer and manufacturer, specialising in lithium-ion technology for electric vehicles. Founded in 2015 by two former Tesla executives, it commissioned its first manufacturing plant in Skellefteå, Sweden in 2021 and announced plans for five others in Europe and North America. The company filed for protection under Chapter 11 of the United States Bankruptc...

Peter A Walker Content Editor. 08:11, 3 MAY 2024; Bookmark. ... a Bathgate-based manufacturer of vanadium flow batteries, to support the commercial development of longer-duration energy storage. ... "We are ...

According to SNE Research, BYD was the world's second-largest EV battery producer in 2023, accounting for 15.8% of global production output. The company has a massive workforce, employing over 704,000 people, with ...

Electromobility (e-mobility), Batteries: (dpa) On its way out of financial difficulties, the Swedish battery manufacturer is looking for a new CEO. The previous top man and co-founder, Peter Carlsson, is vacating his position. Economy Minister Habeck is "cautiously optimistic" about the cell factory in Heide/Holstein.

Silicon anodes for lithium-ion batteries produced from recovered kerf powders

Half-cell cycling of Si-kerf electrodes of (a) Increasing capacity four cycle formation profile of a Si-kerf

half-cell (1st cycle black, 2nd cycle red, 3rd cycle green and 4th cycle blue).

Work is beginning on what is thought to be the world's first major plant to store energy in the form of liquid air. It will use surplus electricity from wind farms at night to compress air so hard ...
